

1074i and 1074ix Enhanced Security Surround

Benefits

Half-inch stainless steel alloy locking mechanism covers 1074i and 1074ix hinges for greater security.

Customer supplied alarm system alerts law enforcement officers if the locking panels are tampered with.

Panels unlock easily to allow access to the ATM for servicing.

Surround also protects ATM from weather and vehicular damage.

Optional backlit signcan and custom graphics increase visibility and promote corporate identity.

Complete support from site planning to delivery, installation, and service.

6' x 10' Free-standing Canopy

Couvrette's 1074i and 1074ix Enhanced Security Surround is designed to increase the security features of deployed 1074i and 1074ix Islander Surrounds. The Enhanced Security Surround adds a second level of alarmed detection to the hinges on the ATM. The steel surround features two locking security panels that cover the hinges on the ATM and adds an internal customer-supplied remote or local alarm system that activates if the panels are tampered with, alerting law enforcement officers of a possible break-in and adding a second level of alarm protection to the ATM. The security panels also increase the time required by thieves attempt to access the cash cassettes. The security panels can be unlocked and pulled away from the ATM, allowing the machine to be accessed for servicing or cash refills. A backlit signcan increase visibility to the installation. Couvrette also supports any customer paint color and provides marketing and branding graphics for any requirement.

Dedicated to quality, Couvrette offers complete turnkey service and provides solutions for site planning, site construction, design, manufacturing, delivery, installation, service, and maintenance.
