

Couvrette's NEXT Surround uses a state-of-the-art thermal-formed manufacturing process that creates a lightweight, non-corroding, UV and impact resistant surround. The co-extruded polymer construction allows the surround to be formed in minutes rather than the hours required for a fiberglass process, translating to faster throughput and lower cost. Optional point-of-sale (POS) panels may be mounted on either the left or right side of the ATM in walk-up installations or wall-mounted beside the surround in drive-up installations. The walk-up surround also offers an integrated writing shelf, and the walk-up POS panel includes an envelope dispenser and waste receptacle, allowing flexibility in configuring the ATM installation.

Dedicated to quality, Couvrette offers complete turnkey service and provides solutions for site planning, site construction, design, manufacturing, delivery, installation, service, and maintenance.

Benefits

Manufacturing process is low cost and offers quick delivery.

Surround uses existing building or opening for easy deployment in walk-up or drive-up installations.

Custom surrounds can be designed to meet any configuration for volume orders.

One piece design creates structural integrity and superior fit and finish.

Backlit signage and optional POS panel create a transaction magnet for the ATM installation.

Complete support from site planning to delivery, installation, and service.
