

Couvrette designs, manufactures, and installs ATM enclosures, including:

- Kiosks, Canopies, Toppers, Mobile ATMs, and Surrounds for ATM installations.
- Pre-fabricated Neighborhood Branch™ buildings with drive-up/walk-in service.

History

E. F. Couvrette Co., Inc. has served the financial industry since 1975. Couvrette Building Systems, our manufacturing division, has been designing, building and installing state-of-the-art ATM enclosures since the inception of automated banking. Couvrette pioneered the drive-up market and has been a trendsetter with our Turn Kiosk which uses a patented D.A.R.E. rotating ATM turntable, the relocatable Classic Kiosk with integrated floor and frame, Mobile ATMs, and pre-fabricated Neighborhood Branches™.

Couvrette incorporates four industry disciplines into a single focus company:

- General Contracting — turnkey service from design to finished and installed product.
- Aerospace Design — high technology engineering for products with top quality and reliability.
- CNC Tooling — precise, repeatable parts supplied efficiently to the production process.
- High Quality Automotive Painting — polyurethane paint for lasting beauty and protection.

These four disciplines, interwoven with synchronous manufacturing and continuous quality improvement, form the cultural fabric of Couvrette. Our commitment to process manufacturing enables customers to order products tailored to their unique requirements, while we maintain the efficiency, consistency, and quality control of a production line.

Couvrette distinguishes itself from our competitors in many ways:

Our expert engineering team provides solutions to our customers' ATM needs. We are the only manufacturer who offers a complete line of products from surrounds to full size branches. We can manufacture in a variety

of materials and can also accommodate existing structure aesthetics by incorporating exterior coverings in wood, stucco, or brick to match the customer's corporate identity and fit existing site environments.

Couvrette delivers and installs our products with our own trucks and crews to ensure proper product fit and operation. We provide storage, staging, and rigging of ATMs across the country. Field service is provided as needed, and maintenance programs are available.

Couvrette offers complete turnkey project management:

Couvrette's turnkey service begins with design, architectural drawings, site planning, and construction, and ends with delivery, installation, and complete customer satisfaction. Our focus on quality is supported by continuous improvement and is implemented through team involvement of the quality process.

An experienced sales team and service division focus on customer needs:

Couvrette has dedicated nationwide Sales Account Executives for consultation regarding your specific equipment, site plan, configuration, design, image, and marketing needs. We prepare proposals complete with renderings and specifications to meet your requirements.

Our Service Division provides a full range of ATM related services, including servicing our own and our competitors' kiosks. All support disciplines are performed by Couvrette personnel. This includes research and development, design, engineering, graphics, manufacturing, and construction.

Couvrette is market-driven and dedicated to customer solutions. Our mission is to be responsive to customer needs by engineering and manufacturing superior products that help our customers achieve efficient and profitable operations. We strive to operate our organization with integrity, professionalism and a commitment to quality.

Turnkey Service from Concept to Completion
